

## SkyTalk Plus Mobile App for iPhone 5S, 5C and later

### The Mobile Workforce is Growing

In fact, industry specialists predict that the U.S. mobile worker population will increase from 96.2 million in 2015 to 105.4 million in 2020. Maintain your competitive edge by adopting the latest technology for your business and consider the following reasons why utilizing a mobile app is a no-brainer:

### Never Miss an Important Business Call

Clients and work associates can easily reach busy employees any time through one business number that will automatically ring their mobile app. Eliminating the necessity to track down employees on multiple numbers, SkyTalk's Mobile App improves and streamlines communications, and seamlessly connects a distributed and fast-moving workforce. Gain the latest communication tools for your staff to never miss a business opportunity.

### Protect Your Business

Calls are directed right to an employee's smartphone without revealing any of their personal information. This helps ensure that business calls continue to be routed to your company versus an individual that may end up leaving to work for someone else (i.e. the dreaded competitor!).

### Stay Ahead of the Competition

SkyTalk's Mobile App supports the virtual business office, enabling employees to connect seamlessly anywhere they need to conduct business.

### Leverage an Investment You've Already Made

You've already invested in a phone system for your business. Why not extend all the benefits you've already gained by making the same features available through your mobile phone?

Employees can make and receive calls placed to their corporate phone number on their device. Additional benefits include:

- Ability to use cellular or WiFi networks
- Extension dialing to co-workers from a smartphone
- Voicemail configuration/greetings and messages
- Voicemail includes playback and forward to co-workers via email
- Corporate and personal phone directories at your fingertips
- One click to join conference calls
- One-button click to reply to missed calls
- "Do Not Disturb" on all devices
- Calendar integration for meeting notification
- Integrated with iPhone, business and local contacts
- Keypad for VoIP client dialing
- Virtual Attendant Settings
- One-button click to reply to missed calls
- Embedded tutorials and help

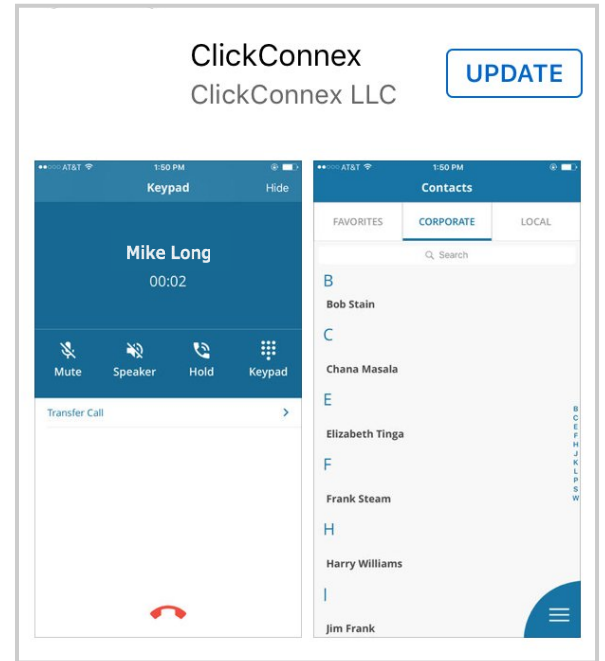

See the reverse side (page 2) for app download instructions

## To Download the SkyTalk Plus Mobile App

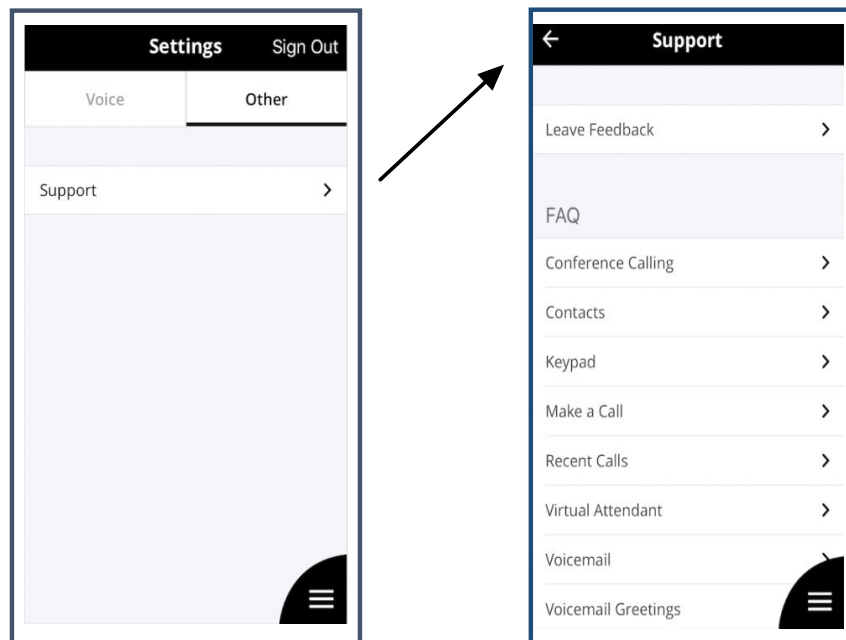

1. Select the "App Store" icon on your iPhone
2. Search for ClickConnex
3. Download the Application
4. Login to the application using your SkyTalk Portal User ID
5. The mobile application currently requires iPhone 5S, 5C, or later

Once loaded the application offers a variety of options:
